

Understanding Mammals Threefoldness and Diversity

Contents

Volume I

1. Motive, Method, and Theme
2. The Threefold Human Organism
3. Threefoldness in the Higher Mammals
4. The Carnivores
5. Cetaceans: Whales, Dolphins, and Porpoises
6. The Rodents
7. The Ungulates—An Overview
8. The Horned Mammals: Cattle and Goats
9. The Horned Mammals: Antelopes
10. The Antlered Mammals: Deer
11. The Giraffes
12. Mammals in their Environment

Volume II

13. The Primitive Mammals
 - a. The Monotremes
 - b. The Marsupials (Albrecht Schad)
14. The Insectivores and Primates
15. The Bats
16. The Xenarthrans (Armadillos, Anteaters, and Sloths) and Pangolins
17. The Lagomorphs, and the Elephants and their Relatives
18. Introduction to Mammalian Embryology

19. Mammalian Embryonic Membranes and Placentation
(Heinrich Brettschneider)
20. Milk
21. The Phenomenon of Death in the World of Mammals
22. The Emotional Life of Mammals
23. Human Threefoldness
